

# MultiLine

*MultiLine is a digital phone service that provides maximum functionality for larger offices with a digital phone system.*

## **What is MultiLine?**

MultiLine is an alternative to traditional ISDN 10/20/30 services and provides primary rate ISDN voice services, with each connection supporting between 10 and 30 lines.

MultiLine connects your business directly to our wholesale carrier-grade national voice network, offering you better service, performance and low call rates.

## **Who Can Get MultiLine?**

MultiLine is available in most metropolitan and major regional areas around Australia and provides the highest level of Direct Access service of any Australian provider.

Ask your account manager today to see if MultiLine is available for your business.

## **What Are The Benefits?**

- **Free setup** - No service installation or number porting costs<sup>1</sup>
- **Room to grow** - Expand the number of available lines in blocks of 5 lines as your business grows
- **Lower cost** - Save on monthly access rental, compared to traditional Telstra ISDN10/20/30 and PSTN services
- **One bill** - The simplicity of a single provider and a single bill for all telecommunication services
- **Network calling** - Low flat rate calls between MultiLine services Australia wide
- **Service reliability** - A dependable service, with M2's advanced digital network
